

Sand daM™

EROSION CONTROL BLANKETS FOR BUNKERS!

Phones: 1/866-SAND DAM, 724/729-2111 Fax: 724/929-0282 Email: Kendra@proturfproducts.com

Subject: *SliderTines*

Our latest innovations for saving you time and money... our new **SliderTines!** **SliderTines** are patent protected, easy to install on any bunker rake, and if turned correctly to the rear, will **NOT** entangle with any materials in your bunkers! Need proof? Install these tines and lower your rake on an out-of-the-way turf area! Then try our **SliderTines** in fairway bunkers and notice that they will not "plow" your sand to contaminate it with the native soil as much as normal rake tines saving you replacement sand costs! **SliderTines** are a great new product that goes hand in hand with our other Sand daM™ family of products for golf course bunkers!

Here are very important facts to consider:

1. They are patent protected.
2. Installation is very easy...will fit **ALL** power bunker rakes.
3. If installed slanting rearward, will **NOT** entangle with any bunker blanket materials.
4. Will **NOT** "plow" select bunker sands into the soils below, thus greatly reducing bunker "contamination"!
